

# Computed Tomography (CT)

## Structured Didactic Education Workshop

**MAY 31 & JUNE 1**  
**8:00 a.m. - 5:00 p.m.**

### Enhance your technical knowledge and prepare for the ARRT CT Registry Exam!

As the field of medical imaging technology continues to grow and change, the role of radiologic technologists continues to expand as well. It is essential that radiologic technologists who want to continue to grow in this field keep up with current technology.

This two-day seminar will provide radiologic technologists with the opportunity to enhance their knowledge in the field of computed tomography.

This seminar satisfies the American Registry of Radiologic Technologists (ARRT) required 16 hours of structured didactic education, and covers the published ARRT Computed Tomography exam content specifications.\*

*\*16.0 hours of Category A continuing education credit - application pending approval*

*Please Note: Attending this seminar does not register you for the ARRT Computed Tomography exam.*

### Program Highlights

- Offered in partnership with the Sinclair Radiologic Technology Department.
- Course topics will be taught by qualified and credentialed faculty members, with review materials provided to all participants.
- Candidates for Computed Tomography (CT) certification and registration must document completion of structured didactic education.

Program located at:  
**Sinclair Dayton Campus**  
Health Sciences Building 14 | Room 220

Cost of the course includes all materials, including Exam Prep textbook.
